Zero loop standard work

TECH@LILLY DAILY CHECKLIST AUTOMATION

BACKGROUND: BUSY SCHEDULES PLUS MEMORY DEPENDENCE CAN LEAD TO MISSED CHECKS.

Pain point

Easy to forget

Urgent meetings and issues can push routine checks aside.

Hard to track

The team cannot quickly see what is done or still open.

Hard for newcomers

New team members need clear tasks, links and guidance.

Limited visibility

Managers cannot easily see status and exceptions.

Business impact

Missing even a single IT check could impact business operations.

A real scene

Busy schedule

Meetings and urgent issues interrupt routine work.

Memory dependence

Tasks can be missed when everything relies on personal recall.

Missed check

A PMX-SAP communication check was not completed on time. An On Hold message was handled late.

Business impact

Delayed message processing increased the risk of production data synchronization delays between PMX and SAP.

Zero loop standard work

TECH@LILLY Issue Solution Finder

HOW TO USE

- 1 Paste an error screenshot
- 2 Or enter key words
- 3 Agent searches historical issues and KB
- 4 **Get standard steps and related ServiceNow tickets**

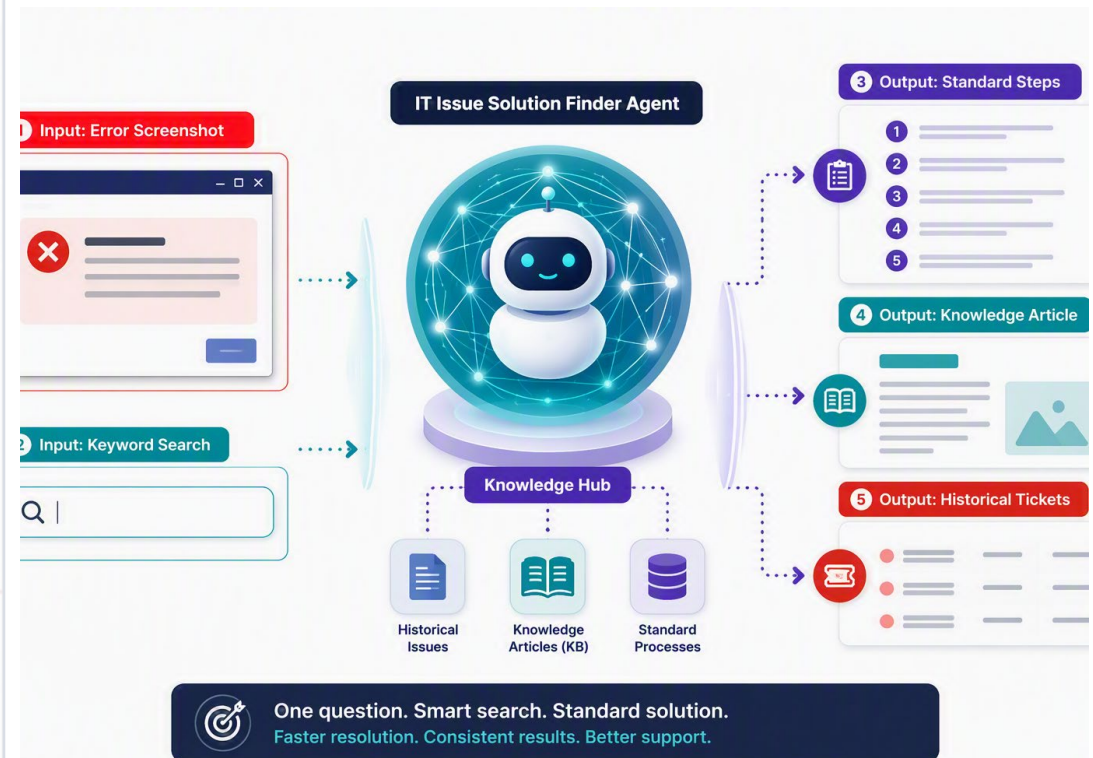

T@Lilly Issue Solution Finder

由 Jing Yang 创建

+ What is the cause of this error? How can this issue be resolved?

One screenshot or a few key words can unlock the team's previous experience.

Zero loop standard work

Build a stronger knowledge loop and make the approach reusable

Lilly

✓ Grow the knowledge base

● Capture operational knowledge

KB articles, issue history and best practices.

● Improve Agent effectiveness

Better source content drives better answers.

📄 Help new team members

● Accelerate onboarding

Learn standard work through guided checklists.

● Enable self-service support

Use the Agent to resolve common issues quickly.

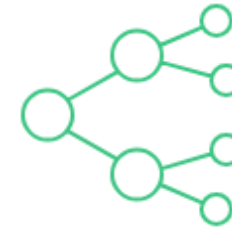

💡 Cross Function Sharing

● Apply the same framework

Reuse the checklist and knowledge model.

● Scale with minimal effort

Extend to other operational teams and processes.

CORE IDEA

Reminder automation helps us complete the right work. The Agent helps us solve issues in the right way.
